GRP WET UNIT

KK 24-11
 25-001

WET UNIT

APPROPRATION

The wet unit with shower is designed for installation on the ships as complete bath room for using by crew and passengers.

This wet unit can also be installed in accommodations land objects.

EXECUTION

Body of the wet unit is made of glass reinforced polyester resins (GRP) with MED certificate.

Integral part of body (wall) is wash-basin placed at the corner and also made of GRP.

GRP floor is stiffened with square pipes 20x20x2. In this floor is placed a scupper with outflow directed to service area.

The wet unit is equipped with handed wash-bowl, door with sanitarylock and ventilation louvre, wash-basin tap, mirror, lamps, hangers, storm grips, socket for razor.

Depending on requirements and needs, the equipment can be agreed.

Water system is leaded on external side of the walls and is made of insulated pipes.

Wiring system is installed on ceiling and on the walls.

DELIVERY RANG

Delivery comprises fully equipped wet unit suitable for connection to water, outflow and wiring system.

PACKING, TRANSPORT, STORAGE

The wet units are packed with foil with additional protection of the doors.

Transport of the units can be carried out by means of fork lift trucks or the cranes.

The goods have to be stored in roofed warehouses.
